

**Noticed a lot of planes flying overhead lately?  
Unless we act now, it's going to get worse.  
A lot worse.**

**The County of Sacramento is attempting to turn Mather Airport into a major cargo hub, not just for Sacramento or California, but for the entire Pacific Rim!!**

**That means dozens more day and nighttime flights.**

*"Our vision for Mather is that it will be THE air cargo facility,  
a hub not just for this part of California, but for the Pacific Rim"*

Paul Hahn, Sacramento County Economic Development Director, *The Sacramento Bee*, 2/14/97

*"Conveniently located midway between the Pacific Rim and Europe, the County operates Mather as  
a cargo aviation facility with the goal of making it into a premier cargo hub."*

Request for Statements of Qualifications and Experience - Sacramento County Airport System  
Air Service/Cargo Development Services, August 24, 2005.

**Are you ready to watch your property values drop?**

There's nothing like 24-hour air traffic and noise pollution over your neighborhood to send home values plummeting.

Like all of your neighbors, you chose this community for its wonderful quality of life. **You may not have signed on to live under the flight path of a major cargo hub, but you can sign on to fight it!**

**Communities for a Responsible Mather Airport** has organized to fight the County's plans and preserve our quality of life. Sacramento County officials think local residents don't care. Support CRMA and help us show them how wrong they are.
